Al- fajr azan clock user guide

I want to choose my city in ALFAJR watch, however my city is not listed in City Setting ? Look up your city in the City Setting page. Why is there a difference of an hour in azan times ? Make sure that the Daylight Saving Time (DST) option is set correctly (see the DST setting in the User's Guide). How can I set the clock to beep 10 minutes before Magrib azan everyday ? Suppose today's Magrib azan is at 6:00 PM. Set magrib alarm reminder to 5:50 PM. (see the Prayer Alarm setting in the user manual). After this first setting, magrib reminder will automatically be adjusted every day to beep 10 minutes before azan. Note : You can set the reminder for any prayer for a fixed interval before or after AZAN time. My country uses daylight saving time (DST) systems. When the time changes by one hour, how can the clock be adjusted? You need to adjust daylight saving time (DST) on or off options. Information about daylight saving time can be found at : webexhibits.com Does qibla direction in the clock mean the arrow points towards the actual direction of Qibla (Makkah), no matter which direction you hold the clock ? No. The arrow indicates the qibla direction in relation to North or Sun or Moon. In other words, you need to point the North Arrow to the North or Sun Arrow to the Sun or Moon Arrow to the Moon, and then the Qibla arrow will point to Qibla.
